

## **FAST FACT**

### **GP RESEARCH**

**You are invited to participate in a research project on Faecal Occult Blood Testing (FOBT) being conducted by the Gastroenterology Department at Peninsula Health.**

The purpose of this research is to establish expectations of local General Practitioners regarding FOBT. By completing this survey, you will provide information regarding your experience and expectations with FOBT. This may assist in further establishing how FOBT are best used and whether the gastroenterology department can make some details about their use clearer for practice in the future.

Please see attachment for further information about the survey, its ethics approval and how your feedback will be used.

Survey closes 13<sup>th</sup> May.

**Survey-** please click on link below
